

Gesundheitsziele im „Health Policy Framework“ in Kärnten

Berlin, 25. Januar 2010

**Dr. Guido Offermanns
Alpen-Adria-Universität Klagenfurt**

Austrian and Carinthian Health Care System

(Until now) Health policy puts more emphasis on

free access, high numbers of providers, technological equipment in health care

than on cost containment, cost effectiveness, quality of services, prevention or health promotion

Separated by Sectors

But this should be changed!

Heterogeneous project group

Group members from all relevant departments and organizations

From different sectors and relevant for the determinants of health in Carinthia

Analysis of existing target programs in Austria and Europe

Health reporting system

Project structure to implement the targets

First Conclusion:
Developing of a health policy framework for Carinthia
